

Antimicrobial Copper Touch Surfaces for Building Projects

U.S. Product Directory

Copper and its alloys are the only antimicrobial solid metal surfaces registered with the Environmental Protection Agency (EPA) that are scientifically proven to kill 99.9%* of bacteria that cause infection within two hours of exposure when cleaned regularly. Naturally potent to pathogens, copper's antimicrobial properties will never expire, wear-off or fade, regardless of material age or patina.

The following antimicrobial copper products are created with metals sourced from EPA-registered suppliers and are marketed under the suppliers' respective, EPA-registered brand names such as CuVerro® and MD-Cu₂₉. With several different copper alloys to choose from, these durable products can exhibit the warm tones of brushed nickel, the colder gray of stainless steel, the warm yellows of brass and bronze, or the traditional red of copper.

*Laboratory testing shows that, when cleaned regularly, antimicrobial copper surfaces kill greater than 99.9% of the following bacteria within 2 hours of exposure: MRSA, VRE, Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, and E. coli O157:H7. Antimicrobial copper surfaces are a supplement to and not a substitute for standard infection control practices and have been shown to reduce microbial contamination, but do not necessarily prevent cross contamination or infections; users must continue to follow all current infection control practices.

Products

Computer Accessories

Countertops

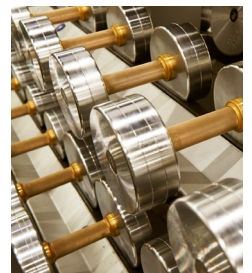

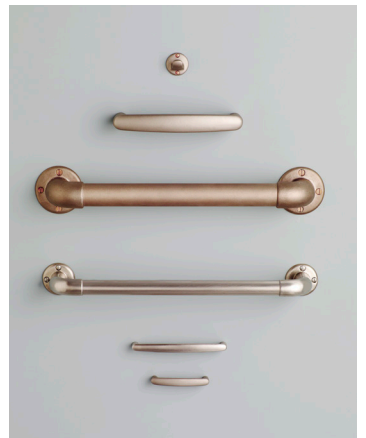

Door & Cabinet Hardware

Fitness Equipment

Railings & Grab Bars

Sinks & Fixtures

Switch Plates & Outlets

Companies:

Below is a list of EPA-registered antimicrobial copper product suppliers who offer an array of interior building products such as free weights, grab bars, door handles, push plates, knobs, levers, hinges, railings, kick plates, countertops, tabletops, keyboards, keypads, computer mice, panic guards, cabinet pulls, drawer pulls, chair arms, sinks, drains, faucets, washroom accessories, armor plates and more.

Please visit the individual company websites, or contact them directly for more information on their antimicrobial copper product offerings and pricing.

Acorn Engineering Company

15125 Proctor Avenue
Industry, CA 91745-0527
(626) 336-4561
www.acorneng.com
Products: Plumbing fixtures

ATEK Access Technologies

- Larco Brand

Larco Product Manufacturing
210 10th Ave N.E.
Brainerd, MN 56401
Tel: (800) 523-6996
www.larco.com
Products: Push-plate wall switches

Black Iron Strength

Tom Grace
3407 NE 113th Street
Vancouver, WA 98686
Tel: (360) 574-6524
Email: tom@blackironstrength.com
www.blackironstrength.com
Products: Fitness equipment

Colonial Bronze

The Colonial Bronze Company
511 Winsted Road
Torrington, Connecticut 06790-0207
Tel: (860) 489-9233
